

Enforcement Academy Continued Competence

After two years, we recommend that officers update their knowledge with this refresher course to ensure that they are still operating at a suitable level and are up-to-date with any changes to legislation.

The Continued Competence course builds on the knowledge gained when you undertook the 5-day Enforcement Academy and includes;

- Environmental legislation refresher and update
- Issuing Fixed Penalty Notices best practice
- Policy reform and insights
- Case Review in the real settings
- Consideration of environmental sentencing guidelines, aggravating and mitigating features and application in practice to get the best possible outcome in court

The session will include the provision of best practice techniques and incorporate real life case scenarios to make the learning experience realistic for enforcement officers.

Who should attend?

Those delegates who have previously completed the 5-day class-room or 8-session on-line National Enforcement Academy course and after two years need to return for an update.

The course is also suitable for managers and experienced officers who are unable to commit to the full 5-days, but want to gain an overview of environmental legislation in practice or attend as a refresher.

Course Duration

6 x hours – Classroom

2 x 3 hour sessions – Virtual
