

KEEP BRITAIN TIDY TRAINING

Enforcement Academy

Keep Britain Tidy Training Enforcement Academy

If low-level crimes, such as littering, small-scale fly-tipping and dog fouling are tackled effectively, it can have a positive knock-on effect.

Pride in community is bolstered, and a clean environment can improve people's health and well-being, encouraging inward investment and reducing the fear of crime.

If the law is perceived to be administered unfairly, public support can be lost and this is particularly an issue with littering, dog fouling and low-level fly-tipping. There is a need to make these crimes socially unacceptable as well as a illegal if we are to change behaviour.

Keep Britain Tidy's Enforcement Academy provides accredited enforcement training to the enviro-crime enforcement profession to develop a common and consistent enforcement approach across the country. It ensures that the knowledge and skills acquired during training can be applied immediately, positively impacting on the work of the officers.

The Academy can be delivered on a regional or in-house basis for current staff and any other teams who have devolved power, enabling them to issue Fixed Penalty Notices. Staff are trained over five days and, as well as understanding the legal aspects, they will be trained on the importance of education and engagement.

Price: £1,500 + VAT per delegate, discounts apply for Network members.

Contact us for in-house prices.

"This course was fantastic. The trainers were friendly, tolerant and knowledgeable. The materials given will assist me and my colleagues to be the best Enforcement Officers."

**Nicky Laville,
Hinckley and Bosworth Council**

More than 200 enforcement officers have been trained by the Academy since it launched in 2014
